

Robotic Playground

Play with several types of robots (Ozobot, Robot Mouse, Dash and Dot, Kibo, Mindstorms EV3, LEGO WeDo 2.0) in this hands-on, problem-based learning workshop. You will build (if applicable) and program the robot, using your own device, then we will complete a series of challenges.

After each exploration session, we will regroup and discuss our experiences and classroom applications of the technology to promote innovative thinking.

September 18, 2017 @ 9:00-3:00 | \$15
