FOREWORD

Please remember as you read this Supplement that it, like the original book, is a genealogy production. These works follow standards and rules established in the "Henry System, Numbers and Letters," one of three major Descendant Research Systems governing genealogy tabulations¹. I wish to thank all who have participated in the process of bringing this Supplement to completion.

Every effort has been made to ensure complete accuracy. However, since this is a 100% volunteer endeavor, it is subject to the constraints of such undertakings. In the case of an ambiguous submission, we had no choice but to include entries which reflect that ambiguity.

DRONES IN AMERICA

There are a number of unrelated Drone lines in America. These include:

1. JOSEPH F. DRON/LaDRONE/DRONE who went to Clermont Co OH in 1831 and later to Gallatin Co. IL. This family is from France where their ancestors are documented back for four centuries. Their descendants are known and today are often settled in the southern two-thirds of the U.S. The book DRONE ANCESTORS 1620-2000 is about this particular family.
 - = The DRON spelling has a French origin related to Drogo, son of Charlemagne,* but they are not his descendants. Francois Dron, father of Joseph F., spelled his own name DRON until his death in OH in 1856. Francois' own signature appears on page 56 of the book.
 - = LaDRONE was used in America in the 1800's by the Joseph F. family specifically to differentiate it from Irish families, according to some of today's descendants in Gallatin Co. IL
 - = DRONE has a British origin related to hills and Perthshire, Scotland.** When writing records English language clerks in America often spelled both 'Dron' and 'Drone' as "Drone." See page 13 of the book.
2. Thomas Drone and Richard Drone who settled in VA mid-1600's; early records suggest these families came from the British Isles.
3. John Drone (Throne) who was in Clarion Co. PA about 1800; he may have been a descendant of the VA Drones or he may have come from Germany. His descendants are known and today often, though not always, are in the northern one-third of the U.S.
4. Denis Drone and John Dron who went to MI and PA from Ireland about the time of the potato famine, 1840's.
- 5..See also page 248 of the book.

Names all over the world have evolved through the centuries from varying origins, occasionally into spellings and pronunciations similar or identical to names of totally different origin elsewhere in the world.
